Professional Summary

Mobile Application Developer with 5+ years of experience, specializing in building exceptional and high-performance mobile applications. Strong foundation in Clean Architecture, modular design using Melos, and native Android/iOS development. Proven history of leadership as a former team lead, delegating tasks, and mentoring junior developers. Currently contributing to large-scale financial and enterprise applications with a focus on performance, modularity, and cross-platform integration.

Technical Skills

Languages & Frameworks: Flutter, Dart, Kotlin (Android), Swift (iOS)

Architecture & State Management: Clean Architecture, BLoC, Provider, GetX, Modular Design (Melos)

Tools & Platforms: Firebase, CI/CD (Fastlane), Git, Crowdin, OCR SDK integration

Professional Experience

Flutter Developer | ValU

August 2025 – Present

- Contributed to the ValU customer app — implemented changes across the Marketplace, Shift, Loan, and Ultra features.
- Built an OCR SDK integration from scratch in the Sales Egypt app; the SDK is now adopted across all ValU applications company-wide.
- Integrated Crowdin for online localization and extracted the integration into a standalone SDK reusable by all apps in the organization.
- Built the Sales Jordan app from scratch: configured Flavors, set up the full CI/CD pipeline using Fastlane, and integrated the OCR SDK.

Flutter Developer | E& Egypt

June 2023 – August 2025

- Worked on E& Cash, a large-scale financial super-app, leading its modularization using Melos.
- Integrated native Android & iOS modules and improved build performance across packages.
- Collaborated with design and QA teams to deliver features on schedule.
- Contributed to a codebase shared across multiple squads with a focus on stability and maintainability.

Flutter Developer & Team Lead | Egypt Best Properties (EBP)

June 2021 – June 2023

- Built the EBP ERP app from scratch for iOS and Android using Flutter and Clean Architecture.
- Led a team of 3 developers: delegated tasks, conducted code reviews, and mentored junior members.
- Integrated Firebase for real-time data, push notifications, and analytics.
- Managed releases on the App Store and Google Play throughout the product lifecycle.

Key Projects

- ValU Customer App:** Buy-now-pay-later super-app serving hundreds of thousands of users across Egypt. (Flutter, BLoC, Clean Architecture, Melos)
- Internal SDKs (OCR & Crowdin):** Reusable SDKs for document scanning and live over-the-air localization updates, adopted company-wide at ValU. (Flutter, Android, iOS)
- E& Cash:** Large-scale financial super-app for payments and money transfers. Led modularization. (Flutter, Melos, Native Integration, BLoC)
- EBP CRM:** Real estate CRM app for iOS and Android, built from scratch with Clean Architecture. Led a 3-developer team.
- WafaPoints:** Loyalty rewards app for Al Tijari Bank. (Flutter, Clean Architecture, Provider)

Education

Bachelor of Computer Science

Faculty of Computers and Information, Ain Shams University, Cairo, Egypt
